

Proactive by design.

SENIOR SYSTEMS ADMINISTRATOR

Are you interested in working for a fun, stimulating, growing, ethical, dynamic I.T. company where your opinion counts and is listened to? Have you ever thought of relocating to Alaska? Right now, the economy in Alaska is far healthier than in the lower 48 states, and the opportunities for outdoor recreation, scenery, and wildlife, are unsurpassed.

DenaliTEK, (www.denalitek.com) is an Anchorage based Information Technology Services employer, is looking for a Senior Systems Administrator. Requirements include the requisite experience and ability, a positive attitude, a proven commitment to your I.T. career and excellence, some I.T. education and certification, your own transportation, current insurance, and a reasonably clean DMV record.

Summary:

The Senior System Administrator's role is to provide advanced network and computer support to DenaliTEK clients, in accordance with our proactive approach. The Senior Systems Administrator role includes acting as a point of technical escalation, monitoring of systems, quality assurance, mentorship and guidance for less experienced employees. Limited after hours and Alaska travel are required.
